Theatre Arts
2006 - 2011

EXPERTISE

Frontend

Core Stack

Vue 2 / Vue 3 | Nuxt 3 (SSR, server routes, REST API)
| JavaScript (ES6+) | TypeScript | HTML5 | CSS3 |
Sass | Responsive & Adaptive UI |
Performance optimization

Additional Stack

React / Next.js | SvelteKit | TailwindCSS | UnoCSS |
Bootstrap | Vite / Webpack | Git / GitLab | Figma

Backend (working experience)

NodeJS | Express.js (API integrations) | PHP (Laravel,
Yii2) | MySQL

Languages

Russian - Native.
English - A2.
Serbian - A2.

Global Technology Solutions DOO | Web Developer | c 2022 - Present

Key Contributions:

- Developed and optimized frontend components for client websites and web applications
- Built responsive interfaces using Vue.js, Svelte, HTML, CSS, and JavaScript
- Implemented UI logic, animations, routing, and interactive components
- Applied SEO and performance improvements to enhance website efficiency
- Integrated frontend with backend services via REST APIs
- Contributed to the full development cycle, from layout implementation to deployment
- Collaborated with designers, marketers, and backend engineers

Deployment & Environment:

- Deployed frontend projects to hosting and VPS environments (Vercel, shared hosting)
- Configured environment variables and integrated external services

Tech Stack:

- Vue.js, SvelteKit, HTML, CSS, JavaScript, TypeScript, TailwindCSS, UIKit, Vite, Git, GitLab, Figma

Other projects

ShareBook | Frontend Developer |

c 2026 - Present

Key Responsibilities:

- Developing UI for the web application (pages, layouts, reusable components)
- Maintaining frontend architecture based on Feature-Sliced Design (FSD)
- Managing application state with Redux Toolkit
- Integrating frontend with REST APIs
- Implementing interface localization (i18n)
- Using MSW for API mocking during development
- Styling and responsive layout with SCSS / SCSS Modules
- Following project code standards (ESLint, Prettier, code review)

Tech Stack:

- Next.js, React, TypeScript, Redux Toolkit, MSW, Axios, Next-intl, Sass

About me

Hi, my name is Evgenii.

I'm a frontend developer with an unconventional professional background. For over ten years, I built a career in the creative industry, which helped me develop strong creativity, empathy, resilience, teamwork skills, and the ability to take feedback constructively. This experience taught me to think outside the box while staying logical, structured, and efficient.

In 2020, the pandemic reshaped my career path, and I decided to fully transition into web development. For the past five years, I've been successfully applying my diverse experience to solve both non-standard and technically complex tasks. My strong sense of form and attention to detail allow me to build well-structured, high-quality digital products.
